CLARIFICATION OF SABODALA MINERAL RESOURCES

In its news releases dated September 9, 2009 and October 19, 2009 and material change reports dated September 15, 2009 and October 21, 2009, Oromin Explorations Ltd. (“Oromin”) reported that its Sabodala Property contained a global mineral inventory of almost 3 million ounces of gold.

This disclosure is not permitted by NI 43-101 and Oromin hereby retracts reference to the global mineral inventory. As previously disclosed, the following estimated indicated and inferred mineral resources were contained within the global mineral inventory:

Higher Grade Au Deposits

Deposit Cut-off Grade (Au g/t)

Golouma West	0.5	6,100,000	2.60	505,000
Golouma South	0.5	2,220,000	4.20	297,000
Kerekounda	1.0	744,000	6.90	164,000
Total Indicated Mineral Resource Estimate		9,064,000	3.34	966,000

Indicated Mineral Resource Estimate

Tonnes Grade (Au g/t) Contained Au (oz)

Golouma West	0.5	502,000	3.00	48,000
Golouma South	0.5	13,000	3.50	1,000
Kerekounda	1.0	244,000	6.10	48,000
Total Inferred Mineral Resource Estimate		759,000	4.01	97,000

Inferred Mineral Resource Estimate

Lower Grade Au Deposits

Deposit Cut-off Grade (Au g/t)

Masato	0.5	32,800,000	1.20	1,220,000
	1.0	15,900,000	1.60	810,000
Niakafiri SE	0	0	0.00	0
Maki Medina	0	0	0.00	0
Total Indicated Mineral Resource Estimate @ 0.5 COG		32,800,000	1.20	1,220,000

Indicated Mineral Resource Estimate

Tonnes Grade (Au g/t) Contained Au (oz)

Masato	0.5	1,535,000	1.40	71,000
	1.0	1,000,000	1.90	60,000
Niakafiri SE	0.5	4,350,000	0.90	119,000
Maki Medina	0.5	1,500,000	1.50	70,000
Total Inferred Mineral Resource Estimate @ 0.5 COG		7,385,000	1.13	260,000

Inferred Mineral Resource Estimate

The balance of the ounces reported in the global mineral inventory reported by SRK Consulting are not considered to be indicated or inferred mineral resources as it is not known at this time whether such material has a reasonable prospect for economic extraction.

The foregoing resource estimate was calculated by SRK Consulting based on drilling up to May 2009 which included diamond core holes up to DH-475 and reverse circulation holes up to RC-625. Since that date, Oromin has completed an additional 125 diamond core holes and a further 30 reverse circulation holes. The objective of the bulk of these 155 new drill holes is to add additional resources and upgrade current resources at the Kerekounda, Golouma West, Golouma South and Epsilon deposits, all of which are categorized as higher grade gold deposits.

A revised and updated resource estimate is scheduled for completion in the second quarter of 2010 and will incorporate these new drilling results as well as additional drilling completed by the end of the first quarter of 2010.

On behalf of the Board of Directors of
OROMIN EXPLORATIONS LTD.
