

Oil Products

Oil Products (OP) manufactures, distributes and markets refined petroleum products across the country. The OP business also procures crude oil and feedstocks for Shell's refineries in Montreal, Quebec; Sarnia, Ontario; and Fort Saskatchewan, Alberta. The refineries convert crude oil into products essential to everyday life, including gasoline, diesel fuel, aviation fuels, solvents, lubricants, asphalt and heavy fuel oils.

Montréal East Refinery

Shell's Montréal East Refinery is the company's largest, refining some 130,000 barrels per day of crude oil.

Sarnia Manufacturing Centre

Sarnia Manufacturing Centre has met needs for refined products such as gasoline and jet fuel for over 50 years.

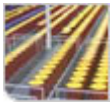

Scotford

Scotford is one of North America's most efficient and modern hydrocarbon processing sites.

Calgary Lube & Grease Plant

Shell's Calgary Lube & Grease is the company's only Canadian grease manufacturing facility.

Brockville Lubricants Plant

Brockville Lubricants Plant is Shell's only lubricant oil blending and packaging facility in Canada.
